- 1** Lay shelf board **1** top-side down on a soft cloth, threaded inserts facing up. Place a foot support **2** at each end, tabs over the outer holes. Fix each with 2 screws **7** and tighten with the Allen key **8**.

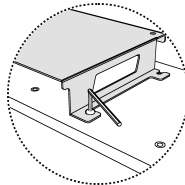

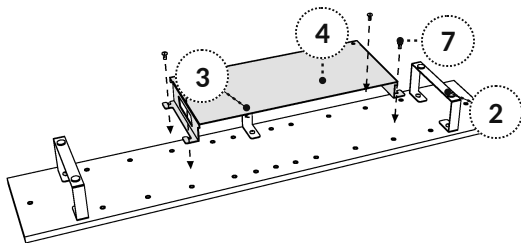

Start every screw by hand first,
then tighten.

- 2** Fit center support **3** in the middle of the back edge, its foot pointing to the front. Fix with 1 screw **7**. It stops the shelf from sagging in the middle.

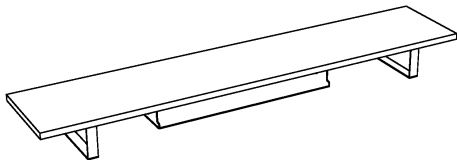

- 3** Place under-shelf tray **4** between the feet, its back lip just in front of center support **3**. Line up the 4 notches in its flanges with the holes. Fit 4 screws **7** and tighten.

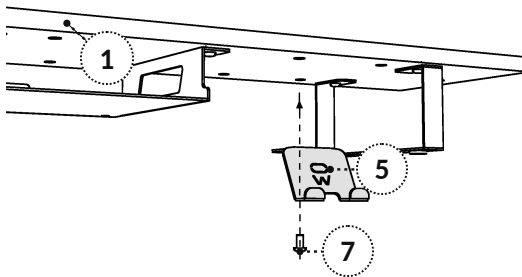

Detail: screw **7** sits in the flange notch. Tighten with key **8**.

- 4** Turn the shelf over and stand it on your desk.

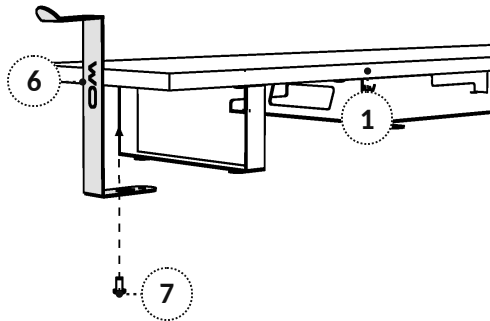

Accessories **5** **6** are optional. Fit only what you need.

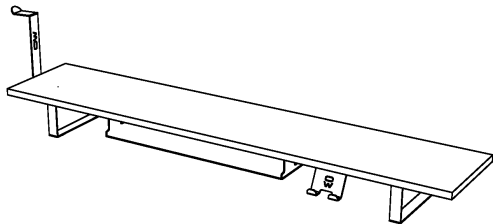

- 5** Mobile holder **5** fits any hole on the front row. Put 1 screw **7** through its slot, slide it to the reach you want, then tighten.

- 6** Headphone holder **6** fits the hole at either end. Put 1 screw **7** through the slot, push the post tight against the end of the shelf, then tighten.

- ✓** Done! Check all screws are tight before use.

Modular: the tray fits the marked tray holes; the mobile holder can move to any front hole and the headphone holder to either end.

Safety Precautions!

- Avoid water contact on the surface. Wipe spills right away.
- Apply cleaning liquid on the cloth, then gently clean the surface.
- Keep away from humid areas for a longer life of the product.
- Do not stand, sit or lean on the shelf.
- Check all screws are tight before use.
