

How to Assemble?

Modular Kids Bed
18 mm laminated plywood

- 1 Back panel × 1
- 2 Head panel × 1
- 3 Foot panel × 1
- 4 Bed base × 1
- 5 Front panel × 1

Size: L 57.9 × W 38.0 × H 28.7 in
(1470 × 965 × 729 mm)

(A) metal strip ×4

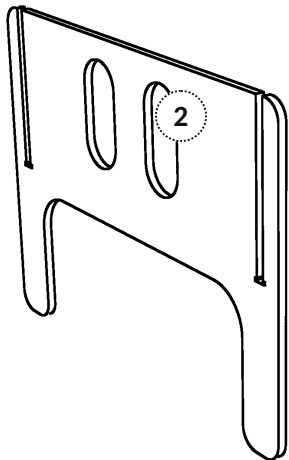

(B) Allen screw ×8

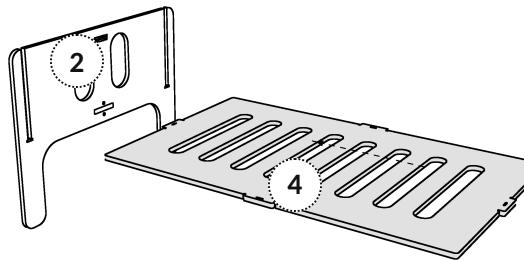

(C) Allen key ×1

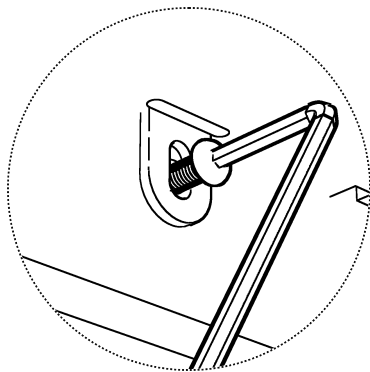

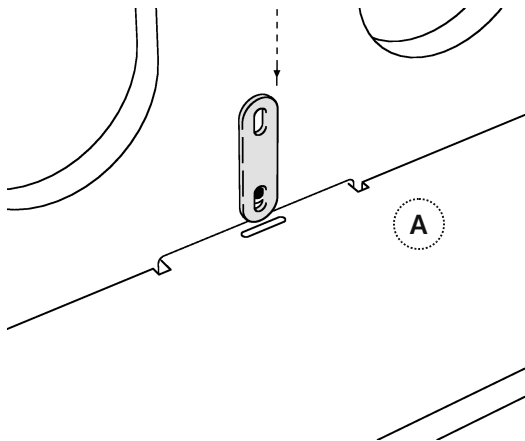

1 Stand head panel **2** up, logo facing in.

2 Slide the bed base **4** into the inside pocket of panel **2**.

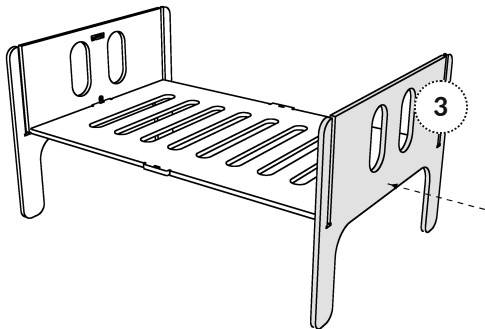

- 3** Lock it now, or the base can fall out: from inside, slide a metal strip **(A)** down through the small slot at the edge of base **4**. Fix it with 2 Allen screws **(B)** into the golden threaded inserts, one above and one below the base, turning the Allen key **(C)** clockwise.

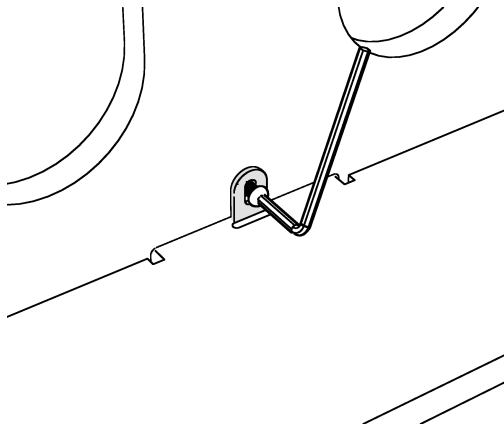

Lower screw: seen from under the base. Do not over-tighten.

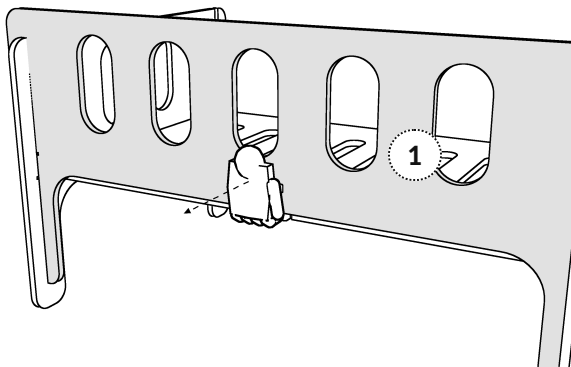

- 4** Push foot panel **3** onto the other end of base **4**.

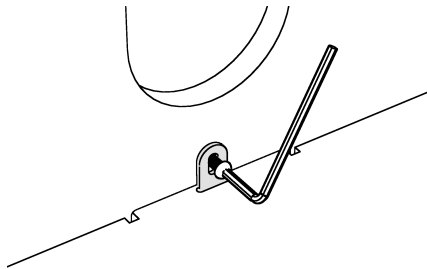

- 5** Lock it the same way: strip **A** + 2 screws **B**.

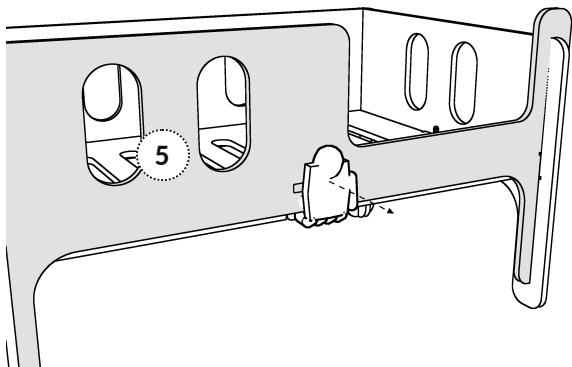

- 6** Lower back panel **1** from above into the corner slots. When it reaches the base, hook one hand under the cut-out in the middle and pull the middle out slightly, push the panel fully down, then let go so the base clicks into the pocket.

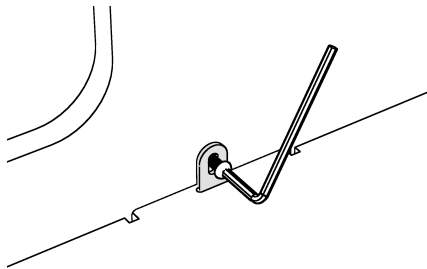

- 7** Lock it: strip **(A)** + 2 screws **(B)**.

- 8** Fit front panel **5** the same way (low opening at the foot end): corner slots first, then pull the middle out at the base.

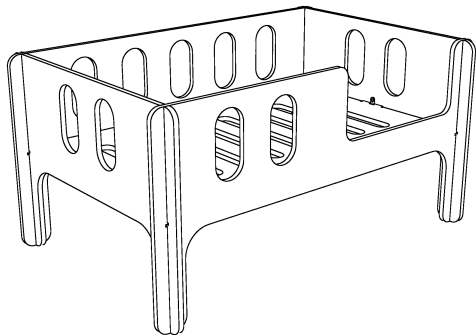

- 9** Lock it: strip (A) + 2 screws (B).

Done! Add the mattress and bedding.

Safety Precautions!

- Assembly by an adult only.
- Check all 8 screws before first use and regularly after.
- Use a mattress that fits the base without gaps.
- Do not let children stand or jump on the side panels.
- Keep small parts away from children.
